Subject: Re: Advice regarding how academically successful your IDM students are in science

Dear Aryan,

While the reason behind the higher preference of science students for design/media or creative arts remains unclear, it's worth noting that 85% of our students originate from science backgrounds, encompassing both PCM and PCB streams.

Regrettably, we are unable to provide statistics on the average grades in science subjects, as our selection criteria don't hinge on specific score requirements in these subjects. Instead, our selection process prioritizes students' aptitude for creative performance.

Thanks & Regards,
Team Admissions

Dear Aryan,

In the realm of Design and creative arts, subject excellence in science holds less significance compared to passing.

Also this trend is particularly true in the case of top institutes in the field.

However, we regret to inform you that we are not equipped to offer guidance regarding the selection of boards. We recommend reaching out to a career counselor for expert advice in this regard. They will be better equipped to assist you with making an informed decision.

Thanks & Regards,
Team Admissions
