Dear Steve,

Many thanks for your enquiry relating to studying Optometry at the University of Hertfordshire.

Each institution offering the Optometry course needs approval from the governing body for Optometry in the UK - the General Optical Council (GOC). As part of the approval process, the GOC also specify what the minimum entry requirements are for the course. When our courses were accredited, we agreed to abide to the terms and conditions set by the GOC - this included the admissions criteria (entry requirements).

For students wishing to apply to the Master of Optometry course (UCAS code B510), we therefore require grades AAB at A-level with at least two A-levels from science subjects (i.e. Biology/ Human Biology, Maths, Physics or Chemistry). One of the science A-Levels must be from Biology or Maths.

Hope this clarifies the reasons behind our entry requirements.

Kind regards,
Optometry Admissions Team,
University of Hertfordshire

Hello

I am Steve Guire and am in Year 12, looking to make my UCAS applications soon. I am taking Biology, Chemistry, and Maths and am predicted AAA based on my performance in AS mocks.

I am aiming for A*A*A* in Year 13. I also achieved 12 grade 9's at GCSE.

My options now I am looking at are:

Optometry (Herts)- my first choice
Optometry (Cardiff)
Optometry (Manchester)
Optometry (Aston)
Dentistry (Birmingham)

I would like to know one thing about the Masters in Optometry you offer:

Why do you ask for AAB (with the high grades in Science A Levels) and not, say, CCC or BCC

Thanks

Steve

Dear Steve,

As well as meeting the requirements of the General Optical Council, the entry requirements do reflect the academic rigour of the course too.

Kind regards,
Optometry Admissions Team,
University of Hertfordshire

Hello

Do your entry requirements reflect the academic difficulty of the course in question (the MOptom)

Regards

Steve
