Hi Steve,

To answer your questions:

Please confirm whether I need to be at the level of a:

Grade 9 GCSE Biology or Chemistry student

Grade A-A* a level biology or chemistry student

No, you do not or we would ask for them within our entry criteria. I can't comment on other institutions, but our entry criteria are based on what our prior evidence suggests give students the best chance of success on our sport and exercise science course.

Kind Regards

Jon

You don't often get email from steveguire123@outlook.com. Learn why this is important

Hello

Please confirm whether I need to be at the level of a:

Grade 9 GCSE Biology or Chemistry student

Grade A-A* a level biology or chemistry student

To learn or understand the content of the course in question

- When I mean "at the level of…" I mean performing at the level of knowledge and understanding as say, an A* student in a level biology or chemistry

Regards

Steve

Hello

I have grades:

BBC predicted in Biology (C), Chemistry (B) and Psychology (B)

Will I need grade A-A* level understanding and knowledge in biology? Or chemistry?

Why do you only ask for BBC for this course? Does it reflect the academic difficulty and demand of the course in comparison to a course asking for A*A*A*

Regards

Steve
