Hello ,
Optometry is not yet regulated by the government of India . The NCAHP-Act 2021 , will regulate the profession under Ophthalmic Science Council ,but the implementation is still under process ..
As a non-regulated profession , Optometry doesn't have a standardised curriculum thus making it a state discretion . Most universities decide on the cut off marks for 12th .
As far as we understand , 60% with Science (Physics/Chemistry / Maths or Bio) is the eligibility criteria for most universities to appear for their entrance . For entrance also a minimum 60 % is required .
As of now we can give you this piece of information .
Best regards,
Paula

Optometry Confederation of India
