Dear Aryan,

Thank you for your query requesting information on: ''I need to know what variables PISA scores for England have been matched to on the NPD. I also want to know why the score for a Grade 9 in GCSE Maths is so low- only 620 on PISA Maths which puts England's top performers in academics way behind their peers in East Asian countries and in some cases South Asia e.g. India'' via data.SHARING@education.gov.uk.

Regarding the question on PISA Variables matched to NPD, 37 variables from NPD have been matched to PISA. The following table displays the matches found:

PISA 2018 - NPD Matched Variable Name
UPN
NFERPUPILID
LAEstab_AUT18
URN_AUT18
DOB_AUT18
FSMeligible_AUT18
FSMeligible_SPR18
EVERFSM_3_SPR18
EVERFSM_6_P_SPR18

IDACIScore_15_AUT18
IDACIRank_15_AUT18
KS2_APS
pupilmatchingrefanonymous
AcademicYear
ACTYRGRP
ATT8
ATT8PRED
ENDKS
INP8CALC
INP8MOD
LAESTAB
NATMTDRES
NATNOR
NATRES
NFTYPE
NORFLAGE
P8SCORE
P8SCOREORIG
P8ADJ
HGMATH91
NATMTDNOR
PLASC
ENGGRADE
MATGRADE

To find more information on the variables, please access the NPD Data table found here: Apply for Department for Education (DfE) personal data - GOV.UK.

Regarding the question on why the average PISA score is low for pupils achieving grade 9 in GCSE Maths. The PISA scores reflect how a sample of students performed on the day of the assessment, with no revision of prior preparation. It is not possible to explain why students performed a certain way within the data or within the sample of pupils selected.

Yours sincerely,
