Dear Aryan

Thank you for your email.

Entry requirements are set to ensure applicants have the right skills and knowledge to successfully complete the course. Where a specific entry requirement in a particular subject is asked for, that means specific knowledge of that subject will be required to study and succeed on that particular course. Entry requirements will vary by course on this basis. In terms of transparency around course content, we use our course overviews and module descriptions on our website to inform applicants about course content allowing them to make informed choices. This is combined with opportunities to visit campus and speak directly to academic colleagues and students on that course.

Kind Regards

Emma-Jayne Jennings

Admissions Officer
University of East Anglia, Norwich Research Park, Norwich, NR4 7TJ, United Kingdom

Subject: A question on your Biology and Chemistry related degree programs

Hello

My question is one to do with transparency.

I am asking whether course entry requirements for Biology and Chemistry courses offered by the University of East Anglia adequately and clearly reflect the nature of the academic course content, level of complexity of said course content, and the course examinations.

If entry requirements, are set at BBC to BBB with a Grade B in Biology, does this mean that all three elements above- the academic course content, level of complexity of said course content, and the course examinations, are designed to be accessible to the student cohort entering said course (which is why the requirements are what they are).

And if entry requirements differ, these differing requirements reflect the specific requirements and nature of the course they relate to, and hence are accessible to the student body specific to that course.

Many thanks and I look forward to hearing from you soon

Aryan
