Dear Aryan,

Thank you for your email.

Please be advised we do not expect our applicant's to be working at a higher grade than the entry requirements we expect of our applicants.

This will not have any impact on your degree, the entry requirements are outlined by the admissions tutor, we do not expect a higher level of knowledge than the grades we request.

I hope this clarifies your queries.

If you have any further enquiries or require further assistance, please do not hesitate to contact us at admissions@northampton.ac.uk or call 0300 303 2772.

Kind Regards

Rosie Robson

Hello

- Please forward this on to the admissions team concerned with this program

I am a student who has the following grades

Grade C in physics

Grade C in maths

Grade B (really only borderline) in Computer Science

Now I meet the entry requirements for your course

But I have a question:

Is it true that I will be **expected to achieve the level of knowledge and understanding of an A* student in Computer Science and Physics** during this course, even though you only ask for a level grades BCC in admissions?

To do this course:

Do I require the same level of knowledge and understanding as

An A* student in Maths or physics?

An A* student in Computer Science?

Your offer of BCC implies you only really need to be on the level of BCC students at A Level to do well on the course as you don't ask for higher grades than this.

Regards

Aryan
